

A Psalm of Hope

Dear God,

Please listen to my prayer and help the animals in the world.

People are polluting the earth with plastic, gas and oil, which is killing the animals and causing climate change.

May you help the animals and help the people to notice that what they're doing is wrong.

I know that you will help because you are as strong as a gushing river and as mighty as the largest mountain.

No one understands that they're killing the beauty of this planet and the people doing this should be taken down by a mighty beast that their pollution had poisoned.

Thank you for listening to me.
Amen
